

KIRAN KUMAR CH

Chennai, Tamil Nadu | +91 9841067579 | [Email](#) | [LinkedIn](#) | [LeetCode](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Software Engineer with experience building enterprise ERP solutions, AI-enabled applications, and secure software systems. Skilled in Java, React, FastAPI, MySQL, REST APIs, and cloud technologies with hands-on exposure to production environments. Experienced in designing scalable applications, optimizing workflows, and developing high-performance software solutions. Passionate about backend engineering, distributed systems, and building reliable products at scale.

Education

VIT Bhopal University, Bhopal, Madhya Pradesh, India

B.Tech Computer Science Engineering (Cyber Security and Digital Forensics)

Expected Aug 2026

Cumulative GPA: 8.52

Technical Skills

Programming Languages: Java, Python, SQL

Frontend: React.js, HTML, CSS, JavaScript, XHMTL

Cloud & Platforms: AWS (EC2, S3, IAM), Firebase, GitHub, Linux, Postman

Operating Systems: Windows, Linux

Cybersecurity Domains: Wireshark, Burpsuite, NMap

Languages: English, Telugu, Tamil, Hindi

Certifications: Oracle Gen AI Professional, Oracle Cloud Associate, IBM Cyber Security Analyst, Oracle Java Foundations Associate, Oracle Architect Associate, eJPT (*In Progress*)

Professional Experience

Suki Software Solutions (Programmer Analyst Trainee)

Mar 2026 – Present

- Engineered enterprise ERP modules using Java, PrimeFaces, and MySQL to streamline business workflows.
- Designed reusable UI components improving usability and maintainability.
- Optimized database queries enhancing application responsiveness.
- Collaborated in Agile teams to deliver scalable features and production fixes.

StayChat AI (Software Developer Intern)

Nov 2025 – Apr 2026

- Developed reusable React components and interactive dashboards using Tailwind CSS.
- Integrated REST APIs to enable AI-powered customer communication workflows.
- Improved frontend maintainability through component-driven architecture.
- Managed Git workflows and deployment pipelines.

The Red Users (Cyber Security Intern)

Feb 2025 – Mar 2025

- Performed network traffic analysis using Wireshark to identify anomalous behavior.
- Automated malware inspection workflows using Python scripts.
- Conducted web application assessments using OWASP ZAP.
- Recommended remediation strategies for discovered vulnerabilities.

Projects

SecureInbox – Secure Email Communication Platform (React, FastAPI, MongoDB)

April 2026

- Developed a secure communication platform supporting encrypted email exchange.
- Implemented JWT authentication and role-based authorization.
- Designed scalable FastAPI services for secure message transmission.
- Integrated encryption mechanisms to strengthen confidentiality and integrity.

Streamlined Malware Analysis with Ghidra (Python, C++)

Dec 2024

- Developed custom scripts for malware inspection and reverse engineering.
- Automated repetitive analysis tasks reducing manual effort.
- Leveraged symbolic analysis and memory mapping for threat investigation.
- Enhanced efficiency in malware triage and vulnerability identification.

Health Oracle – AI-Driven Health Assistant (React Native, FastAPI, ML)

May 2025

- Built FastAPI microservices supporting AI-driven health prediction.
- Integrated wearable datasets for personalized analytics.
- Developed APIs enabling secure communication between ML models and mobile applications.
- Delivered predictive insights through machine learning workflows.

Hackathons & Activities

Smart India Hackathon (SIH) 2025

- Developed an urban mobility solution emphasizing intelligent routing, accessibility, and enhanced user experience.
- Collaborated in a multidisciplinary team to design scalable and user-centric features under strict timelines.

National Cadet Corps (NCC)

- Demonstrated leadership, discipline, teamwork, and effective decision-making through training programs and camps.
- Strengthened communication, adaptability, and collaborative skills in dynamic environments.
