Professional Summary

Software Developer with experience in enterprise ERP development, full-stack engineering, and cybersecurity. Currently working at Suki Software Solutions, building scalable business applications using Java, REST APIs, and PrimeFaces. Strong in backend systems, problem-solving, and performance optimization, with hands-on experience in real-world production environments.

Education

VIT Bhopal University, Bhopal, Madhya Pradesh, India
B.Tech Computer Science Engineering (Cyber Security and Digital Forensics)

Sep 2022 – July 2026
CGPA: 8.52

Technical Skills

Languages: Java, Python

Frontend: HTML, CSS, JavaScript, React, Tailwind CSS

Backend: Java, REST APIs, FastAPI

Databases: MongoDB

Cloud & Tools: AWS (EC2, S3, IAM), Firebase, Git

Cybersecurity: Wireshark, OWASP ZAP, Ghidra

Platforms: Windows, Linux

Professional Experience

Suki Software Solutions - Software Developer

March 2026 – Present

- Developing enterprise-level **ERP solutions** using **Java, PrimeFaces, and REST APIs**
- Building and optimizing scalable backend services for business workflows and data processing
- Designing dynamic UI components for ERP modules to improve usability and efficiency
- Handling real-time data operations, system integrations, and process automation
- Debugging production issues and improving system performance and reliability
- Collaborating with cross-functional teams in agile environments to deliver scalable features

StayChat AI - Software Developer Intern

Nov 2025 – Apr 2026

- Built scalable UI components using **React and Tailwind CSS**
- Developed real-time chat systems and dashboards improving user experience
- Integrated AI-driven modules with REST APIs for automated responses
- Optimized frontend performance and application responsiveness
- Managed Git workflows and ensured smooth deployments

The Red Users - Cybersecurity Intern

Feb 2025 – Mar 2025

- Automated malware analysis workflows using Python
- Analyzed network traffic using Wireshark to detect anomalies
- Performed web application security testing using OWASP ZAP
- Identified vulnerabilities and suggested backend security improvements

Projects

Health Oracle – AI Health Assistant (React Native, FastAPI, Machine Learning)

Dec 2025

- Developed a mobile application integrating wearable data for health prediction
- Built secure backend APIs using FastAPI
- Implemented ML-based insights for personalized health monitoring

FarmEasy – Farmer–Buyer Platform (Android Studio, Kotlin, Firebase)

(Ongoing)

- Built a direct marketplace connecting farmers and buyers
- Implemented product listings, transactions, and notification systems
- Focused on improving transparency and reducing dependency on intermediaries

Malware Analysis using Ghidra (Python, C++)

May 2025

- Performed reverse engineering and memory analysis of malware
- Automated repetitive analysis tasks using custom scripts
- Improved efficiency in vulnerability detection

Certifications

- Oracle Java Foundations Associate
- Oracle Cloud Associate
- Oracle Gen AI Professional
- IBM Cyber Security Analyst
- Oracle Architect Associate
- NPTEL – Cyber Physical Systems
- **eJPT (eLearnSecurity Junior Penetration Tester) – In Progress**

Hackathons & Activities

SIH 2024: Built an urban mobility solution focused on routing and user experience.

NCC: Demonstrated leadership, discipline, and teamwork during training and camps.

Languages: English, Telugu, Tamil, Hindi
