Chennai, Tamil Nadu | +91 9841067579 | kirankumarch1915@gmail.com | GitHub: <https://github.com/Chiku014>
LinkedIn: <https://www.linkedin.com/in/kiran-kumar-chebrolu-733815211/> | Portfolio: portfolio-mu-sage-mg4ytva6h4.vercel.app

PROFESSIONAL SUMMARY

Engineering graduate with hands-on experience in enterprise applications, REST APIs, databases, cloud environments, automation, and technical troubleshooting. Experienced in working with Java, Python, SQL, FastAPI, MySQL, AWS, and API integrations across production and project environments. Strong foundation in HTTP, authentication, authorization, browser developer tools, networking, root-cause debugging, and secure software systems, with working knowledge of compliance frameworks (SOC 2, ISO 27001, GDPR) through IBM Cybersecurity Analyst coursework. Interested in Product Support Engineering roles at the intersection of technology, product, security, and customer problem-solving.

TECHNICAL SKILLS

Programming: Java, Python, SQL, HTML, CSS, JavaScript

APIs & Backend: REST APIs, FastAPI, API Integration, HTTP, JWT Authentication, Role-Based Authorization

Databases: MySQL, MongoDB, Database Querying

Cloud & Platforms: AWS EC2, S3, IAM, Firebase

Debugging & Tools: Postman, Git, GitHub, Linux, Browser DevTools & Network Inspection, Wireshark, OWASP ZAP, Burp Suite, Nmap

Security & Compliance Frameworks: SOC 2, ISO 27001, GDPR Fundamentals, MITRE ATT&CK, Vulnerability Assessment & Remediation

Technical Areas: Application Troubleshooting, API Debugging, Root-Cause Analysis, Authentication & Authorization, Networking, Cloud Systems, Automation

Certifications: Oracle Java Foundations Associate | Oracle Cloud Infrastructure Associate | Oracle Gen AI Professional | IBM Cybersecurity Analyst

PROFESSIONAL EXPERIENCE

Suki Software Solutions — Programmer Analyst Trainee

Mar 2026 – Aug 2026

- Developed and supported enterprise ERP modules using Java, PrimeFaces, and MySQL, working across application, UI, and database layers.
- Investigated and resolved application and production issues by analyzing backend logic, database queries, and system behavior, performing root-cause analysis and escalating unresolved defects to senior engineers.
- Optimized database queries and application workflows to improve responsiveness and reliability.
- Built reusable and maintainable components used across multiple business modules.
- Collaborated with team members in Agile sprints to deliver features, troubleshoot issues, and support ongoing application improvements.

StayChat AI — Software Developer Intern

Nov 2025 – Apr 2026

- Developed reusable React components and interactive dashboards for an AI-powered customer communication platform.
- Integrated and tested REST APIs supporting end-to-end customer communication workflows.
- Debugged frontend and API integration issues by analyzing application behavior, network requests, and data flow using browser developer tools.
- Improved maintainability through component-driven architecture and reusable application components.
- Worked with Git workflows and deployment processes to support reliable releases.

The Red Users — Cybersecurity Intern

Feb 2025 – Mar 2025

- Analyzed network traffic using Wireshark to identify anomalous behavior and understand network communication.
- Automated malware inspection and repetitive analysis tasks using Python, improving investigation efficiency.
- Performed web application security assessments using OWASP ZAP and documented identified issues.
- Gained hands-on exposure to HTTP requests, web applications, network protocols, authentication concepts, and security troubleshooting.

PROJECTS

SecureInbox — Secure Email Communication Platform *React | FastAPI | MongoDB*

Apr 2026

- Built a full-stack secure communication platform supporting encrypted message exchange.
- Designed and implemented RESTful APIs using FastAPI for message transmission and application workflows.
- Implemented JWT-based authentication and role-based authorization across the API layer.
- Worked with MongoDB for secure data storage and retrieval while troubleshooting backend and integration issues.

Health Oracle — AI-Driven Health Assistant *React Native | FastAPI | Machine Learning*

Dec 2025

- Built FastAPI microservices supporting AI-driven prediction and analytics workflows.
- Developed APIs enabling communication between machine learning models and the mobile application.
- Integrated datasets and backend services to support data processing and personalized analytics.

Streamlined Malware Analysis with Ghidra *Python | C++*

May 2025

- Developed scripts to automate repetitive malware inspection and analysis workflows.
- Used reverse engineering concepts and automated tooling to support efficient malware triage.
- Investigated program behavior using memory mapping and symbolic analysis techniques.

EDUCATION

VIT Bhopal University — B.Tech Computer Science Engineering

Expected Oct 2026

Specialization: Cyber Security & Digital Forensics | CGPA: 8.52/10

HACKATHONS & ACTIVITIES

Smart India Hackathon (SIH) 2025

- Collaborated in a multidisciplinary team to develop an urban mobility solution focused on intelligent routing and accessibility under tight deadlines.

National Cadet Corps (NCC)

- Developed leadership, teamwork, communication, discipline, and decision-making skills through structured training and collaborative activities.
