PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student (Cyber Security & Digital Forensics) with hands-on software development, cloud, and analytical experience across trainee and internship roles. Skilled at translating business requirements into working technical solutions, with a track record of building full-stack applications, automating workflows, and applying secure-by-design principles. Seeking to bring a blend of programming, cloud, and problem-solving skills to a technology consulting and digital transformation role.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, JavaScript, SQL
- **Web & App Development:** HTML, CSS, React, Node.js, Firebase, REST APIs
- **Cloud & Platforms:** Oracle Cloud Infrastructure (OCI), Git/GitHub, Linux
- **Data & Analysis:** Data analysis, requirement gathering, process automation, MS Excel
- **Security & Compliance:** SIEM basics, incident response fundamentals, NIST framework awareness, secure SDLC

PROFESSIONAL EXPERIENCE

Programmer Analyst Trainee — Suki Software Solutions

Mar 2026 – Present

- Developed and supported software modules by translating client requirements into functional technical specifications, contributing to on-time delivery.
- Collaborated with cross-functional teams to debug, test, and deploy application features, improving code quality and reducing defect turnaround time.
- Applied structured problem-solving and documentation practices to support scalable, maintainable solutions.

Software Development Intern — StayChat AI

- Built and integrated features for an AI-driven chat application, working across front-end and back-end components.
- Worked directly with product requirements to prioritize and implement functionality aligned with user needs.

Cybersecurity Intern — The Red Users

- Performed vulnerability assessments and supported incident-response documentation, strengthening analytical and risk-assessment skills applicable to technology risk consulting.
- Mapped identified threats to the MITRE ATT&CK framework to support structured, standards-based reporting.

PROJECTS

FarmEasy — Full-Stack Web Application

- Built a full-stack application with Firebase authentication and role-based access control (RBAC), demonstrating end-to-end ownership from design through deployment.

SecureInbox | Health Oracle

- Designed a solution to detect and flag suspicious email activity, applying secure coding and automation principles; separately built a data-driven app to analyze and present health insights.

Malware Analysis Tool (Ghidra + MITRE ATT&CK Mapping)

- Built a tool to analyze malware samples and map findings to the MITRE ATT&CK framework, combining technical analysis with structured reporting — a workflow directly transferable to consulting-style client deliverables.

EDUCATION

VIT Bhopal University

Aug 2022 – Aug 2026

- B.Tech, Computer Science Engineering (Cyber Security & Digital Forensics) — CGPA: 8.52

CERTIFICATIONS

- IBM Cybersecurity Analyst Professional Certificate | Oracle Cloud Infrastructure (OCI) Foundations Associate
- Oracle Cloud Infrastructure Generative AI Professional | Oracle Java Foundations Associate
- eJPT — Elearnsecurity Junior Penetration Tester (In Progress)
